Cargo transportation

Transport of animals

Humanitarian mission

Covero

Work all over the world

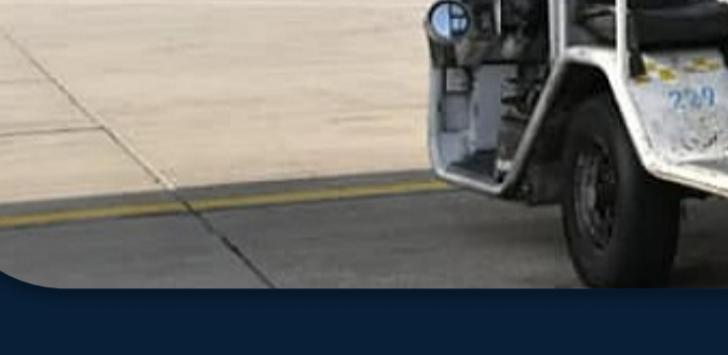

IL76 cargo hold is fully-pressurized and has a titanium floor with fold-down roller conveyors.

Main cargo deck is equipped with 4 overhead cranes running the full length of the cargo hold, each of which with lifting capacity of 3,000 kg, and two winches.

A hydraulically-operated rear loading ramp itself can be used as a lift, with a capacity of up to 30,000 kg. It allows roll-on and roll-off loading of wheeled and tracked vehicles.

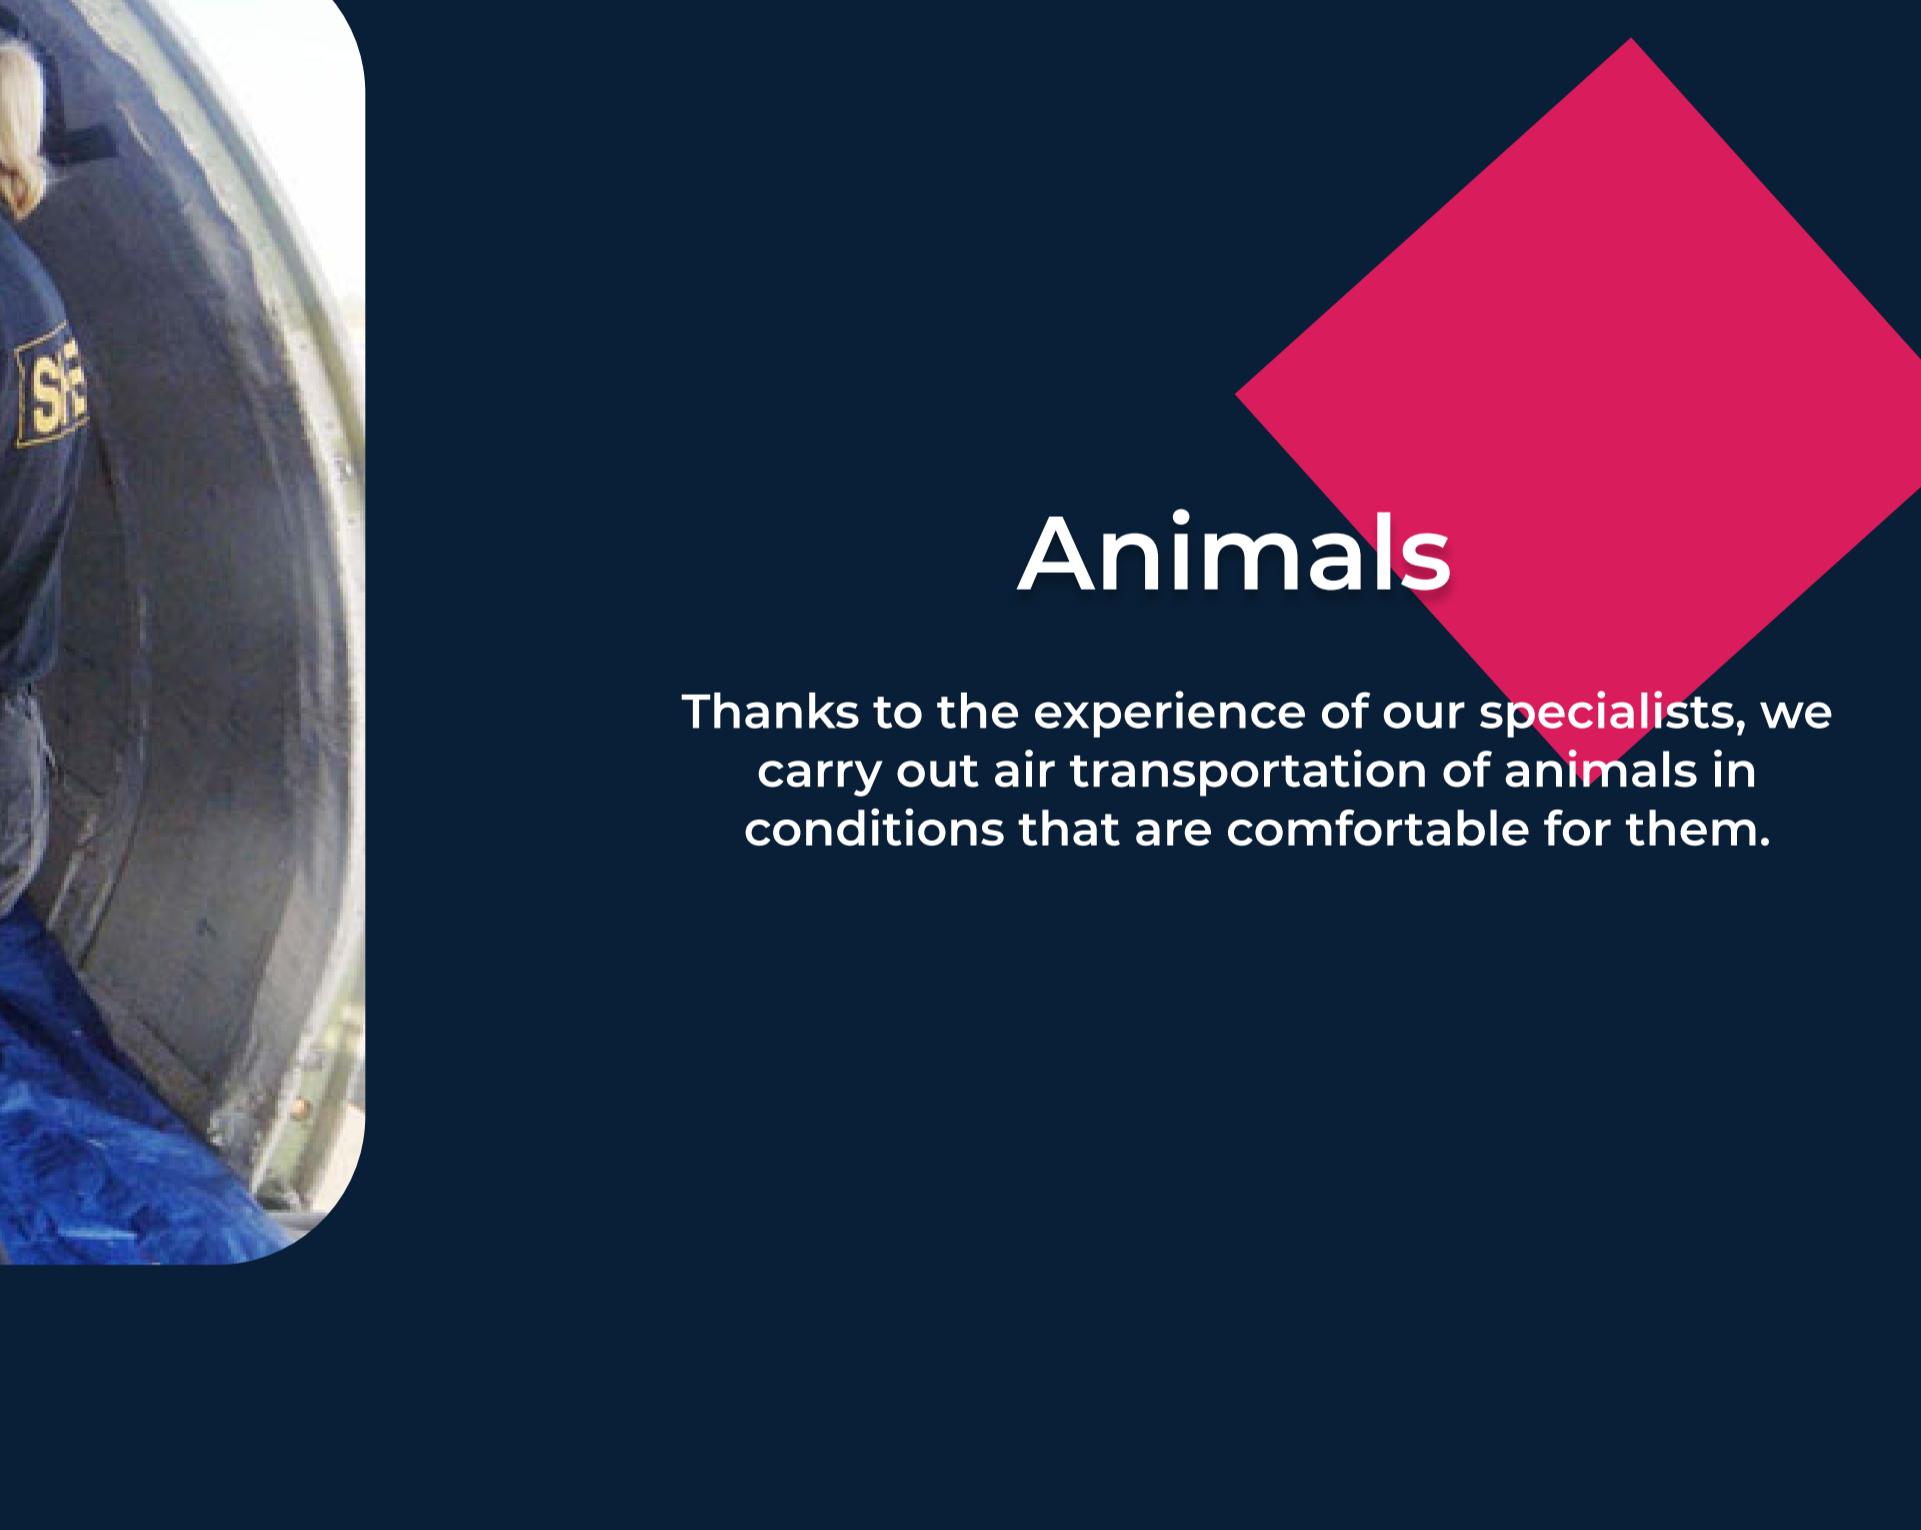

Although the cargo deck is compatible with international standard sea containers and pallets, the plane, originally designed as a military transport, proved to be also ideal for loading offloading of rolling stock, trucks, vehicles, out- and oversized gears, dangerous goods (including UN Class 1 cargo).

Covero

Hummanitary mission

We carry out transportation of goods within the framework of UN humanitarian missions. In hard-to-reach regions. Thanks to the many completed contracts and the experience gained, we are the best solution

Animals

Thanks to the experience of our specialists, we carry out air transportation of animals in conditions that are comfortable for them.

Covero

Air transportation of small cargoes

We regularly carry out transportation of small-sized cargo from various countries of the world. This type of transport allows our Clients in Ukraine to reduce their transportation costs and not overpay for incomplete loading of vehicles (container or car), thereby ensuring optimal delivery prices

Covero

Great chose

Covero aims at setting the benchmark for the world's best practice in Aviation services. With unparalleled dedication and commitment, our company is primarily positioned to effectively link the United Arab Emirates to the far east African continent and middle east, except sanctioned countries different countries.
